MY FAVOURITE SEASON

Hi! My name is Sally and I want to tell you about my favourite season. It is spring.

Spring is one of the four seasons. It is between winter and summer and it lasts from March to the end of May. The beginning of spring is the first of March which is my birthday, too.

Spring is my favourite season because days begin to get longer and nights begin to get shorter. The weather starts to get warm. When spring comes, children put away their winter coats and boots and bring out their shorts and T-shirts. In this season many people are excited to go out for a walk. The sky is usually blue and the sun shines. Red, yellow, purple and pink... These are some colours of spring and they make the world more beautiful. The green grass and new plants start to grow at this time of the year. You can see many different insects like butterflies, bees, ants and grasshoppers outside. Children can fly their kites in the fields, ride their bikes in the parks or play football in their green gardens on a spring day.

There are lots of fun activities to do. What's your favourite season?

Read the passage above and answer the questions by using long sentences.

1. How many seasons are there in a year?

2. What are the spring months?

3. Why don't people wear coats and boots in spring?

4. Which insects can you see outside in spring?

5. What fun activities can you do on a spring day?
